BAYSHORE
DENTAL STUDIO

BASIC DENTURE

Low-cost option
ideal for provisional
restorations

PREMIUM DENTURE

Better construction
and materials make a
useful prosthetic

IMPLANT SUPPORTED

Improves retention,
function, and long-
term health

- Basic dentures are made from "good enough" materials.
- Their main purpose is to serve as a provisional until a more permanent solution is obtained.
- Long-term wear of a basic denture is uncomfortable and unhealthy.

- Premium dentures are the most affordable treatment for tooth loss.
- Premium dentures can be very convincing and comfortable when well-made.
- However, long-term wear is not recommended unless necessary.

- Implant retained dentures balance lightweight materials with heavy-duty retention.
- Dental implants can help mitigate bone loss due to edentulism.
- Various attachment systems are available.

HYBRID BAR

CAD/CAM titanium bar provides stability for the whole arch

- A rigid and biocompatible titanium bar provides stability for increased function and improved health.
- Several bar designs available. Your dentist will help choose the ideal solution.
- Main limitation: Acrylic is not durable.

Z BRIDGE

Solid Zirconia is a super durable and functional material

- Zirconia is a biosafe ceramic that is actually stronger than natural teeth.
- Z Bridge mimics the functionality and durability of natural teeth.
- Tissue-colored composite has lifelike esthetics and increased durability versus acrylic.

SiMPLiCiTY[®] ICS

Adaptable, functional, easy to repair, and incredibly lifelike

- SIMPLiCiTY[®] ICS combines the best features of earlier restorations.
- A lightweight titanium frame holds individual crowns. This design allows adaptability for superior results.
- Cost is offset by increased functional lifespan.

THE BAYSHORE DIFFERENCE

Bayshore Dental Studio has been serving dental professionals since 1992. Based in sunny Tampa, FL, Bayshore has been ranked among the top 7% of dental laboratories in the United States by Lab Management Today. We are proud of being named a finalist (top 16 out of 260+ lab submissions) in the *Lab Management Today* magazine contest.

Our continued success is due to working with skilled dental professionals. We were recently featured in *Dentistry Today's* Top 100 Dental Products issue, and nominated for a prestigious Townie Award by *DentalTown*.

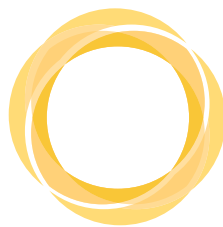

Our Bayflex™ Flexible partial denture was the only removable partial denture featured in the *Clinician's Report* 2013 Best Product Guide.

93% of *Clinician's Report* evaluators would recommend Bayflex over other flexible partials.

Bayshore Dental Studio has partnered with Donated Dental Services (DDS) to provide dental prosthetics on an as needed basis for patients throughout the United States. DDS is a partner with the National Foundation of Dentistry for the Handicapped and helps provide treatment to often overlooked and at-risk populations.

Bayshore Dental Studio understands what a healthy and attractive smile can do and is proud to serve our country's needy patients. One such case was recently featured on the television show *The Doctors*.
